1. **Pair Mobile Phone and Call**

   **Pair your mobile phone**
   - Power on your headset then choose:
     - Tap the Voice button \(^1\) and say ‘Pair mode’ or
     - Press and hold the Call button \(\mathbb{Q}\) until you hear ‘Pairing’. While the headset LEDs are flashing red and blue, activate Bluetooth \(^6\) on your phone and set it to search for new devices.
   - While the headset LEDs are flashing red and blue, activate Bluetooth \(^6\) on your phone and set it to search for new devices.
   - Select ‘PLT_Legend’. \(^3\)
   - If prompted by your mobile phone for a passcode enter 0000. Once successfully paired, LEDs stop flashing red and blue and you hear ‘pairing successful’. Some phones may prompt you to allow access to contacts to enable caller name announcement.

   **Pair another phone**
   - After pairing your headset to your phone you may want to pair another
     - Power on your headset then choose:
       - Tap the Voice button \(^1\) and say ‘Pair mode’ or
       - Press and hold the Call button \(\mathbb{Q}\) until you hear ‘Pairing’.
   - While the headset LEDs are flashing red and blue, activate Bluetooth \(^6\) on your phone and set it to search for new devices.
   - Select ‘PLT_Legend’. \(^3\)
   - Once successfully paired, LEDs stop flashing red and blue and you hear ‘pairing successful’. \(^4\)

   **Unlock the microphone** by tapping the Mute button \(\mathbb{I}\). \(^5\)

   **Voice dial (mobile phone feature)**
   - Press the Call button \(\mathbb{Q}\) for 2 seconds, wait for phone prompt and then tell the phone to dial the name of a stored contact.

2. **Connect PC and Call**

   **Connect**
   - Power headset on.
   - Insert Bluetooth USB adapter directly into your PC USB port. Once inserted, Bluetooth USB adapter will flash blue. \(^2\)

   **Pair Mobile Phone and Call**
   - Insert Bluetooth USB adapter directly into your PC USB port. The LED will flash and then turn solid blue to indicate the headset is connected to the PC. You will also hear ‘PC connected’. The LED remains solid blue when not on an active call.

   **USB cable to PC or USB wall charger**
   - Load Plantronics Spokes software by visiting plantronics.com/software and click on the download button.
   - Pair your mobile phone.
   - Connect headset to PC or USB wall charger.

   **Charge case to PC or USB wall charger**
   - Note: the charge case has an internal battery and can fully recharge your headset twice while on the go before needing connection to a charge cable.

3. **Charge and Fit Headset**

   **Charge**
   - Replace the ear-tip for a better fit.
   - Push in ear-tip and rotate to the left to unlock it.
   - Align new ear-tip into slot.
   - Push in ear-tip and rotate to the right to lock it into place.

   **To Re-pair your Bluetooth USB adapter**
   - In the event that your headset and Bluetooth USB adapter become unpaired do the following:
     - Power headset on.
     - Remove the USB adapter.
     - Power on your headset then choose:
       - Tap the Voice button \(^1\) and say ‘Pair mode’ or
       - Press and hold the Call button \(\mathbb{Q}\) until you hear ‘Pairing’.
     - Insert Bluetooth USB adapter directly into your PC USB port. Once successfully paired, LEDs stop flashing red and blue and you hear ‘PC connected’.

   **Fit your headset**
   - Replace the ear-tip for a better fit.
   - Push in ear-tip and rotate to the left to unlock it.
   - Align new ear-tip into slot.
   - Push in ear-tip and rotate to the right to lock it into place.

4. **Use and Reset Smart Sensors**

   **Use sensors**
   - Smart Sensors react when you put on or take off your headset.
   - Putting on your headset will:
     - Answer an incoming call
     - Transfer an active call from your phone (available only with your mobile phone)
     - Resume streaming audio
     - Taking off your headset will:
     - Transfer an active call to your phone handset (available only with your mobile phone)
     - Pause streaming audio
     - Lock the Call button to prevent accidental calls.

   **Try voice commands**
   - Tap the Voice button \(^1\) wait for command request, then say a command. For example, “What can I say?” tells you the full list of available commands.

   **Reset sensors**
   - You may need to reset the sensors if they are not working as expected.
   - Wearing the headset, tap the Call button to reset sensors:
     - Tap once voice and sensor features are working
     - A tone means sensors need to be reset
   - To reset the sensors, charge your headset and place as a flat non-magnetic surface for more than 10 seconds.

**Quick Start Guide**

1. **Pair Mobile Phone and Call**
2. **Connect PC and Call**
3. **Charge and Fit Headset**
4. **Use and Reset Smart Sensors**
